

WATER DAMAGE RESTORATION

When your home or business is being threatened by water damage from flooding or pipe breaks, Valcon Contracting Corp. has the expertise to prevent and mitigate the devastating effects water damage can have, while preserving and restoring your property.

Water Damage Restoration:

- Broken pipes
- Sewer backups
- Heavy rain damage
- Leaky roofs
- Hidden leaks
- Defective rain gutters
- Water heater failure
- Air handler failure
- Soft water system failure

- Water main breaks
- Pipe freezes
- Snow
- Weight ice/snow
- Ice damming
- Tornado
- Wind storm

Natural Disaster:

- Hurricane damages (wind & water damage)
- Microbursts
- Strong wind damage
- Mud slides
- Hailstorm damage
- Rainstorm & Flash flooding
- Area wide forest fires
- Area wide cold fronts that cause frozen pipes
- Anything else nature brings your way

Water Removal Equipment

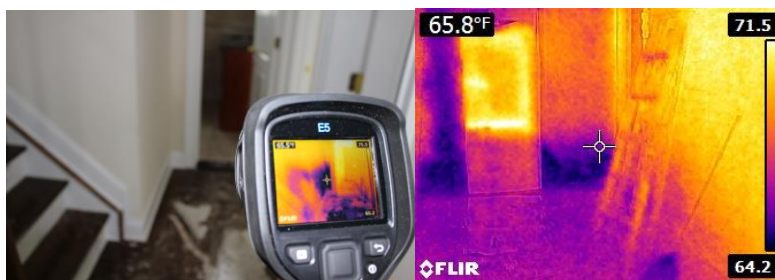

- Moisture detectors, hygrometers, and other meters measure the degree of saturation
- Thermal imaging cameras are used to pinpoint water location for complete water extraction
- Submersible and gas-powered pumps for continuous pumping of high level water
- Truck mounted and portable extraction systems perform efficient water withdrawal

Sanitizing Agents, Germicides, & Anti-Microbial Treatments

- Deodorization devices restrict odor from excessive moisture
- Disinfection products eliminate the growth of bacteria, fungi, mildew and other harmful microorganisms
- Negative air devices constantly run to clean and block the spread of air spores
-

High-Tech Drying Equipment

- Drying apparatus prohibits water damage such as swelling and warping of floors, walls, and furniture
- Industrial quality dehumidifiers diminish secondary water damage
- High-speed air movers generate airflow across carpets, walls, and furniture to evaporate moisture
